

The Apollo Collection

Oval Table

Small Circular Table

Large Circular Table

Inspiration, perspiration and in initial manufacture, even desperation forged this outrageous concept. Thinking 'outside the square' was definitely the order of the day at Artistry in translating the original doodles into practical reality. From laser profiled 10mm flat steel plate the form is generated by a controlled heating and forging process into a three dimensional table structure.

Initially offered in three models of occasional tables comprising of large and small circular tables and oval table, all come with 10mm clear or sandblasted toughened safety glass tops. Naturally there is a wide choice of coatings to the steel. Optional high sheen silver is illustrated. This early compact range may hopefully be expanded into bigger and better things - watch this space!

Dimensions

Item	Height (mm)	Length (mm)	Depth (mm)
Small Circular Table	470	650 Dia	
Large Circular Table	470	914 Dia.	
Oval Table	470	1075	610
