**ARTISTRY IN IRON**

# Henley

The HENLEY range is an extension of the traditional concept of wrought iron furniture upon which the base of Artistry In Iron is founded. This design although echoing historic features incorporates full sized back rests of deep cushioning in the HENLEY dining and carver chairs. The trade mark dining table feature that can only be fully appreciated

when incorporating a glass top is also utilised on the coffee table. The rolled and formed substantial legs of the dining table are reflected in similar style, albeit of reduced scale on all of the other pieces thus giving continuity and integration of design for full room settings.

This range is manufactured entirely in the UK and is

available in the Artistry In Iron range of 12 metal finishes, table tops in clear glass, sandblasted glass and various timbers. Naturally a full range of fabrics is offered together with the service of coverings in customer own or special fabrics.

*Please see separate sheet for wood and metal finishes.*
